Art Unit: 2851

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen.
- Regarding claim 1, the claimed "film clip" is met by film container holding chamber 21.

 The claimed "outer film cover" is met by the rear cover of film package casing 2. The claimed "inner film cover" is met by the frame around exposure aperture 23.
- 4. Regarding claim 2, cartridge 4 is a 35mm film cartridge.
- 5. Regarding claim 3, the film container holding chamber 21 includes a slot for the film to feed to the exposure aperture which is readable on the claimed "film guide."
- 6. Regarding claim 4, the claimed "winding housing" is met by film winding chamber 22.
- 7. Regarding claim 5, there are numerous portions of the Chen device that have a so-called "step configuration" such as the rear cover of film package casing 2.
- 8. Regarding claim 6, the drawing figures clearly show that the elements 20-23 of Chen are removably contained within the rear cover of film package casing 2 by the tabs on the ends thereof.
- 9. Regarding claim 7, again it is noted that there are numerous portions of the Chen device that have a so-called "step configuration" such as the rear cover of film package casing 2.

Art Unit: 2851

- 10. Regarding claims 8-10, the claimed "flare", "slot" and "rib" are met by the tabs and their corresponding slots shown in the drawings of Chen.
- 11. Claims 24-29 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by So et al.
- The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Allowable Subject Matter

- 13. Claims 11-23 are allowed.
- 14. The following is a statement of reasons for the indication of allowable subject matter:
- 15. The prior art does not disclose or suggest "first and second removable covers enclosing a portion of said film clip when said film clip is removed from said film housing" in combination with the remaining elements as claimed in claims 11-15.
- 16. The prior art does not disclose or suggest "inserting the film clip into the first film cover" and "inserting the second film cover over the film clip" in combination with the remaining method steps as claimed in claims 16-18.

Application/Control Number: 10/081,136

Art Unit: 2851

17. The prior art does not disclose or suggest "attaching the first and second film covers to

one another over the film clip" in combination with the remaining method steps as claimed in

claims 19-21.

18. The prior art does not disclose or suggest "attaching the first and second film covers to

the film clip on opposite sides of the film clop between the film cartridge and the winding

housing" in combination with the remaining method steps as claimed in claims 22-23.

Conclusion

19. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to David M Gray whose telephone number is 703-308-1698. The

examiner can normally be reached on M-T & T-F 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Russ Adams can be reached on 703-308-2847. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-872-9318 for regular

communications and 703-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-1782.
